

NAME HARIS

ROLL NO 23P-0573

cd basically cd is used for changing directory from one to another directory
Ex: am in home directory cd home/zenvila am changing the directory

ls :

ls command is for list all the file that present in the current directory . To list down

touch :

touch command is used to create a new file where ever you want .

Ls > newfile .

this command is used for the redirection like if we don't want to show all the directiores and files on the termianl then this commands redirects all the output to the file (newfile).

Cat < newfile .

Cat stands for can catinate means to show the output on the terminal but in this mode it is just readable not for edit .

Ls -lh :

ls for list where -lh is used to to list all the file which is human readable

ls -lh 1> newfile :

to list all the things which is present in the newfile h stands for human readable

lsot

this command is an error

lsot 2> newfile :

to redirect error to the newfile

rm newfile :

to remove the file from the directory .
